As a surprise for his army of fans, Seasick Steve has released a brand new album which is available digitally now! Entitled ‘Blues in Mono’, the album cover tells you exactly what to expect from the album. Just one man, his voice, his acoustic guitar and one microphone.

‘Blues in Mono’ is a timeless tribute to traditional, acoustic country blues recorded with a microphone from the 1940s, with Seasick Steve performing the songs solo, direct to an old tape machine. This is an album that fans have been crying out for, for years.

‘Blues in Mono’ finds Seasick Steve giving some of his finest performances to deliver a fresh, stripped down blues album that offers the perfect antidote for the troubled times in which we live. Steve has curated a selection of songs to cover, from his favourite artists such as Willie Dixon, Lightnin’ Hopkins, Charlie Patton and Mississippi Fred McDowell.

The album also features 4 new Seasick Steve tracks including the lead track Well, Well, Well.
