Sonny Landreth's unique spin on guitar playing has made him legendary. He combines the slide with fretted notes; this finger picking technique helps him create a complex, multi-layered sound onstage. Along the way Landreth has continued to develop his vision and his musical voice, growing increasingly original and diverse, expanding from blues, zydeco, folk, country and jazz into increasingly category- blurring musical excursions. The album Recorded Live in Lafayette is a perfect showcase of Landreth's talents and skills. ---amazon.com
