Soundcells Wave Drummin WAV REX

'Wave Drummin' is not just another percussion ReFill. The sounds of this percussion library open doors to percussive bliss that have never been opened before.

By finding a whole new continent, Columbus redrew the map of our planet. Now it's your turn to do so.

By making use of this ReFill you can combine enchanting and haunting rhythms coming from all continents, maybe even from other planets as well. At their studio in Central Europe, Soundcells recorded their favourite hits and bits coming from the ever popular Wavedrum by Korg, while being caught by rhythms coming from distant worlds.

The result of this all has become this ReFill, a work of art, a tool that lets you draw your own restyled map of our precious planet.

Realism vs Mixability: Lots of samples taken from acoustic, real percussion instruments have the tendency to sound kind of dull in your mixes. The power of their sound often gets mudded by the rest of your instruments. With this in mind Soundcells processed all DSP generated percussion coming from Korg´s Wavedrum Oriental in such a way that the sounds will always sit conveniently in your mixes. Their impact and power will never get lost. Another point that needs to be highlighted is this special stereo knob, that comes with lots of combinators that works

wonders for the mixability of theseloops. Check it out! Genre Crossover: The sounds of this percussion library are as authentic as you wish and at the same time they can be as electronic as you wish.

There is no limit to their sonic possibilities. So whether you are a Dance producer druling over Techno or Electro beats or you are a vegetarian ethno guru spiritualist... 'Wave Drummin' will help you get there. Check out the demos! Wave Drummin

Contents: • 115 combinator patches stuffed with inspiring new energy. • 107 REX loops that range from authentically acoustic to crazy electronic stuff, 20 Kong kits, 20 NN-XT patches and 7 Redrum kits. • 210 single hits to build your own kits from. • Recorded impact noises coming from Brushes, Rods, Sticks and Fingers to add extra realism to the loops. The combinators carry knobs to control their volumes. • All single loops and samples are included into this download in REX and WAV formats. By purchasing this pack you are not restricted to Reason only. However there is a lot more magic to be found within the ReFill.
