I am proud to present to you for your consideration, my latest musical effort.

This cd is a compilation of 15 of my favorite songs. There are both live performances and studio recordings on this cd. The stories that I tell on this album are true, and I like to think of this project as a "from the streets" report on present-day life in the inner city. The subject matter ranges from romantic intricacies to drug addiction.

It is my hope to say something that is relevant to the contemporary urban audience, and to re-introduce the young listener to the music of our heritage in a format that they can appreciate. ...it's the story of my life.

This is my vision of "blues" for the 21st century. ...I hope that you will enjoy it! ...it has been a labor of love. ---Billy Jones
