"Fuzzadelic". Saturated in the warm fuzzy embrace of classic tones, Chicago's The Seventh Sons take their brand of rock, and decorate it in elements of reggae, funk, psychedelia, punk rocked blues, and freestyle jamming.

Fresh out of the studio, the power trio just finished up work on their first full length studio album "The Turnaround". These songs mark a new breakthrough in the creative evolution of The Seventh Sons and are sure to take you on a journey through their minds.

This 3 piece locks in and takes off on organic and fluid jams using originals, classics, and B sides as spring boards in and out of these jams. They will often serve up some tasty jamwiches live by sandwiching songs between others. The Sons are just as comfortable belting out some heavy driving music in a biker bar as they are playing Dead standards to their hippie friends at a back yard party, or getting lost in trippy jams that are made up on the spot. All 3 members have the freedom to create on the fly and take songs in different directions, but their ability to follow each other is what keeps the organic jams fluid. The Seventh Sons' originals draw from reggae influenced beats, funky wha leads, and dirty blues heavy grooves. For some reason a little Dead, a little Doors, and some Stones always seem to make it into the set with an occasional drum circle igniting for a finale. Accessible and available before and after shows, the Sons come out to hang with the people they are playing with, and for, and above all they come to have a good time and to share the music they love with old friends and new ones! ---cdbaby.com
