by Phill Niblock.

"The music of Michael Vincent Waller offers a welcome and rare alternative to the tempo and noise of modern life. These touching miniatures employ the pure modal scales first described by ancient Greek philosophers and sustained through millennia in the folk song of many lands, in religious chant, and in the modern era by the works of composers such as Erik Satie (especially his monodrama 'Socrate') and Terry Riley (especially 'A Rainbow in Curved Air').

Waller's music convinces us by its honest emotion, which avoids any artifice that would dramatically pull us toward some effect. Although it is the first time we have heard these works, we seem to immediately understand the intimate feeling they refer to." --- "Blue" Gene Tyranny, From the liner notes of The South Shore

Michael Vincent Waller's The South Shore is a double-CD collection of 31 short chamber works composed between 2012 and 2014. Waller belongs to the generation of postminimalist composers who have absorbed the techniques and procedures of the avant-garde, yet he has moved on to find fresh resources in the use of Greek modes, traditional counterpoint, and the influences of impressionism, gamelan, pandiatonicism, and postmodernism. The diversity of Waller's instrumentation is initially striking, though this is perhaps more noticeable in a collection where the combinations change from track to track, though the variety seems to be ad hoc rather than purposefully eclectic. Even so, there is unity in Waller's dedicated use of modal harmonies and canonic interplay, which lend an antique quality to many of the selections, especially Atmosfera di Tempo and Per La Madre e La Nonna, among several other works written for strings, as well as the organ piece, Organum. Yet the influences of Erik Satie, minimalism, sacred chants, and popular music can be detected in other works, and all share a tendency toward quiet, lyrical expressions and subdued meditation. Waller's unhurried and gentle music is well-suited to introspection, and the smoothness of the performances and the evenness of dynamics set a consistently reflective mood. ---Blair Sanderson, AllMusic Review
