17. *Tres Peu Anime* 18. *Tres Anime/Vif/Un Peu Anime/Vif* 19. *Lent/Anime* 20. *Anime*  
Julian Bream – guitar London Symphony Orchestra André Previn – conductor

This album is a delicious offering from one of the most underrated guitar maestros of all time. Not only does he capture the Samba-inspired passion of Villa-Lobos music (unlike Rodrigo, Villa-Lobos was an accomplished guitarist in his own right), but interprets it in a way that commands and maintains the attention.

The concerto, one of the most accessible of all guitar concertos, was originally commissioned from Villa-Lobos by Segovia - but don't hold that against it! There are some memorable passages, not to mention the moody passion in the cadenza, all played with the kind of mellifluous dynamics that are synonymous with Bream's playing.

Whilst the Etudes are more of academic interest than musical, Bream conveys a level of interpretation that makes what would otherwise be dry study pieces into listenable melodies. The six preludes illustrate the full range of Villa-Lobos compositional palette, and are some of the best kept secrets in music. --- "iancurtis3", amazon.com
