Frank Gambale is best-known for his fiery work with Chick Corea's Elektric Band. He was a student at the Guitar Institute of Technology while in his early twenties, wrote instructional books, and during 1983-1986, was on the school's faculty. He joined Corea in 1986, has also performed with Steve Smith's Vital Information, and has been a leader on his own rock-oriented dates for JVC. A collaboration with bassist Stu Hamm and drummer Steve Smith was another fruitful venture for Gambale, spawning several discs between the three that became increasingly ambitious as time went by. ---Scott Yanow, Rovi
