I was thrilled when I discovered Postmodern Jukebox, and was initially most taken with some of their oldest work, mostly with Robyn (and Puddles). But I am getting more and more thrilled with the variety of vocalists and material. This music just makes me fantastically happy. --- mschmidt62, [itunes.apple.com](https://itunes.apple.com)

I would love to have Scott's work on CD too. Never-the-less, the CD is fantastic, especially if you like to hear popular singers singing their hits in different ways, rather than just listening to the mainstream version, try out Scott Bradlee's Postmodern Jukebox, you'll love it. He has others; I just learned of this one through a friend. I plan to collect them all. But again, I think the work definitely merits being obtainable on CD. In fact, I think I am going to turn off my cable delivered music off and play Emoji Antique right now! --- Keaton Treece, [amazon.com](https://amazon.com)
