2009 release, yet another 'big' shot crafted by the creative outfit led by mastermind Pit Baumgartner. Big means "back to the future" for the band and its unique sonic world of sound. Although a lot of the track titles might sound familiar, this is anything but your average "greatest hits" collection. Instead, De Phazz rise to the occasion and reinterpret their best and most successful songs with a bit of an ironic smile on their faces and "a little help" from a real, full blown big band. And so it comes as no surprise that all songs on Big organically develop quite a stylish and tasty life of their own, extending the huge potential of the original compositions in many exciting directions. Big tunes, big band, big expectations... big things going on for real! ---Editorial Reviews, amazon.com
