I don't own this CD, but I have 95% of the songs in it on other CD's. They are all great melodies. My only concern is, that I do not know if the Edmundo Rivero recordings were his older ones when his voice was fantastic (40's to early 50's), or newer recordings when he had just about lost his voice. Barring that, I would definitely recommend getting this CD because it contains more tangos from the "golden age" than any other compilation CD I have seen. Again, the melodies are great! ---Joe Vasquez, amazon.com
