Originally released in 2000 and consisting of 5 CD's with 103 songs, El Salmon (Box 5cd) was one of those albums that either you love or hate. Recordings made in a disorganized environment, recorded on a 4 track recorder on conventional tapes (later remastered in the studio, but not re-recorded), with Andres performing multiple instruments and with media talk about public and private violence (it was said back then, later confirmed by Andres, that his neighbors had him move out from his house because of this)

The sessions were infamous and with plenty of his friends participating playing (Ariel Rot, Gringui Herrera, etc) and singing (Bunbury, Pappo and others) The album included many

original songs as well as versions from other artists such as The Beatles, Bob Marley, Luis Alberto Spinetta, The Rolling Stones among others. El Salmon was, in the end, an underrated album that the critics panned by comparing it to the now classic Honestidad Brutal

Ten years after, and with the excuse of the 10th anniversary and the fact that the original album was not released in many countries in which he now is quite well known, Andres revisits 'El Salmon' and releases a selection from the 103 songs plus 5 previously unreleased songs ('El Salmon' had not yet been released and Andres had already over a hundred new songs recorded) The cover? an old LP bleeding with the colors of the Argentinean flag!

The first thing to consider before getting this album is that, unlike Andres: Obras Incompletas, these tracks have not been remastered, so the home-recording quality from the original release ten years ago is still there in many of the songs. This album is a selection of 49 songs out of the original 103 (plus five never released tracks), most of the covers in the original were removed while some of them remain ('El Viejo', 'Alfonsina y el mar' and a couple others) I would say if you do not own the original release this is definitely a safe bet unless you are a Calamaro completist, if that is the case, well, the original edition is a no-brainer. I do remember ten years ago going over the five discs (or "fingers" as Calamaro labeled them) and thinking what an awkward album it was, some great songs, some regular ones and some others that I just didn't get at the time.

Throughout the years and mostly after Regreso, Andres has included many of these tracks in his tours, many songs that were obscure among other well known tracks are now sung by fans at concerts, songs like 'Lo que no existe mas', 'Tuyo siempre' (how to forget the incredible version from 'El regreso' with the Bersuit Vergarabat as Andres' band), 'OK perdon', 'Dias distintos', 'Output-Input' and many others. Back then he was asked for his top five songs out of the 103 and he mentioned 'Freaks', 'Expulsado del paraíso', 'Jugando al límite', 'Tu pavada' and 'Gaviotas', interestingly enough, all of them are included in this new edition except for 'Freaks'

As a selection from the 103 songs in 'El Salmon', 'Salmonalipsis Now' is a solid review of the original material, Andres has this theory in which 'musicians have to work every day' and record all the songs they can come up with. Well, this selection is the perfect example of what he accomplishes by doing so (more recently the twenty something 'Absolut Bounce' tracks he released for free in his official website) The new songs included follow the same line, after all, they were recorded in the same sessions! 'Mi nariz', 'Musica lenta', 'Superlogico', 'Ringo y Alberto' and 'Feliz cumpleaños' (completists may want to know, if you do not already, that Andres made available for free a compilation called 'Salmon X' in the web last year, it should
