Fantastic!! ... the incomparable enchanting voice of Julio Iglesias. I love Latin music and Julio combines his angelic tenor voice with other Mexican masters on this MASTERPIECE. The mood captures us from the first downbeat and you just know it will be a fantastic journey. The entire album features Mexican artists in duet, and all are new recordings it seems (but I could be wrong). The beat is totally infectious; that turns on your happy dancing feet as you pick up the soft drift of the beautiful melodies and swinging in bare feet through your music fantasy with Julio. Now that would be a dream fantasy!! And if your man is tired and worn out, it is a beautiful romantic dinner album to kindle the night flames of love over escargot soaked in garlic butter and a few apertifs.

I recall falling totally in love with Julio's first big NA album, *Bel Air Place*. I listened and danced to it with my love until it was worn out. Living in Canada in winter, it was a journey into the rapture of California fantasy, soft love, and passion. Unfortunately as time goes by Julio has been a bit forgotten in NA I think, complimented by his talented son Enrico, among the younger generation. But Julio is the father of the son, and make no mistake, he still in King of the Spanish Balladeros. It is wonderful music. Search out his legendary career. Enjoy the fine music for lovers and those who dream of compassion and romance, the essence of our private life and happiness!!. ---Kristina, amazon.com
