Buying time and thwarting bootleggers, Nirvana and DGC released the rarities compilation *Incesticide* toward the end of 1992. Like any odds'n'sods collection, this is uneven, but that's its charm since it captures Nirvana's character better than any official album. After all, this was a band that was born equally from '70s sludge metal, bubblegum pop, post-punk artiness, and indie rock inclusiveness, each of which are apparent on this collection. There are some non-entities here, particularly on the second side, but the plodding sub-metallic grind was part of their identity, one part of their multi-faceted character. Nirvana meant everything to everyone, from the jangle pop veterans to the garage rock ravers that worshipped the Stooges to stoner metal fetishes and indie rock bed-sits that adopted Sebadoh just as they outgrew Morrissey -- everybody loved Nirvana, and there's something for every kind fan here, thanks to murky sludge, Devo and Vaseline covers, BBC sessions, instrumentals, and limited-edition singles, plus sub-Melvins goop, everything visceral where *Bleach* was tame. *Nevermind* doesn't capture this freewheeling indie spirit but *Incesticide* does, piling on some essentials in the meantime -- the pummeling "Dive," the childhood snapshot "Sliver," the terrific forgotten indie pop tune "Been a Son," and "Aneurysm," perhaps the greatest single song the group ever recorded. Yeah, there's some filler here, but this is the sound of what Nirvana was actually like. ---
