The Rolling Stones' BBC sessions haven't been accorded the same deluxe bootleg treatment as those of The Beatles, for two big reasons: they didn't record nearly as much for the Beeb as The Fab Four, and (unlike The Beatles) didn't record many tracks that they didn't release on record. Good fidelity tapes exist of a few dozen of their mid-'60s BBC airshots, and fans will find them worth picking up. Heavy on R&B covers (the Stones, like The Beatles, didn't record for the BBC after 1965), the tracks, as is par for the course on radio sessions, don't better or usually even equal the studio renditions, but have an interesting rougher live feel. They did manage to let rip on a half-dozen or so unreleased covers, and these items are naturally the most interesting, especially their takes on "Memphis, Tennessee" and their incendiary "Roll Over Beethoven," which is perhaps even better than the well-known Beatle version. ---Richie Unterberger, AllMusic Review

Back in the 1960s, British broadcasting law required a certain amount of live music to be played on the country's airwaves, essentially in an effort to prevent musicians from losing work to those dastardly job-stealing things known as records. While this requirement was largely phased out by the early 1970s, as a result there are untold thousands of hours of British Invasion-era acts performing live or quickly-recorded versions of their hits, deep cuts, covers and the like, and nearly every act of note has released a "BBC Sessions" compilation ...

... Except, until now, the Rolling Stones. For decades, the group essentially ignored the treasures in its vast vault of unreleased material — presumably out of boredom — and consequently their BBC sessions, comprising several dozen tracks recorded between 1963 and 1965 for such quaintly titled radio shows as “Saturday Club,” “Top Gear,” “Rhythm and Blues” and “The Joe Loss Pop Show,” were available only on usually-dodgy-sounding bootlegs. Yet the group has been excavating their vault at a steady clip over the past several years, and now, some 54 years after their first session, a sonically optimized the compilation of the material has arrived. ---Jem Aswad, variety.com
