Stonebolt were a rock band from Vancouver, B.C. They formed under the name Perth Amboy as a 3pc in 1973 and quickly swelled to 5 members. They were Ray Roper, David Wills, Brian Lousley, John Webster and Dan Atchison. The band played in Canada and the U.S. before landing a major label deal with RCA. They released their debut album in 1978 and had an international hit called, *I Will Still Love You*, that cracked the Billboard Top 30. They also appeared on *American Bandstand*. The group would release three more albums before breaking up in 1983. *New Set Of Changes* was their third release in 1980. It's a good album that perhaps wasn't as commercially successful as their previous releases but had some great tunes.

The band also does a Beatles' cover called, *Please Please Me*, on this album. They would reform in the late nineties and release an album of familiar songs and continue to play live from time to time. The album, *New Set Of Changes*, is a difficult find today. ---
