Playing psychotic Rock n' Roll with elements of punk, metal and of course psychobilly, they create demonic sounds resonating from the belly of the beast himself.

In the city of E-ville, Deadmonton Hellberta, under a fiery glow of a blood moon in October 2014, with autumn rust igniting the landscape like a massive funeral pyre, The Devil's Sons were spawned. Playing psychotic Rock n' Roll with elements of punk, metal and of course psychobilly, they create demonic sounds resonating from the belly of the beast himself.

The band began playing shows in the spring of 2015, and soon found themselves sharing the stage with bands like The Brains, Raygun Cowboys, and celtic punk legends The Mahones. Now with winter upon us, The Devil's Sons are finalizing their full length debut album and getting ready to set the stage ablaze once again to spread the good word of the Dark Lord!

Be forewarned! This ain't no Hocus Pocus, Mumbo Jumbo. This is The Devil's Music, This is Rock n' Roll! ---cdbaby.com
