After the disorganized and often unlistenable Alan Douglas-produced reissues in the '70s and '80s, MCA has been releasing the vast Hendrix archives in an intelligent and methodical manner. Blues is a perfect example, making the case that--on top of everything else--Jimi Hendrix was one fine blues guitarist. Combining the fluid lines of B.B. King with the spikiness of Hubert Sumlin and the crying tone of Elmore James with his usual synapse-frying intensity, Hendrix manages to both honor the music tradition while remaining uniquely himself. These studio outtakes and warm-ups (plus one previously released track, the magnificent "Hear My Train a Comin'") include a playful "Mannish Boy," the slow burn of "Once I Had A Woman," and a metallic "Bleeding Heart." ---Steven Mirkin, Editorial Reviews
