broke up. Cuby went his own way as blues&funksinger Harry Muskee. In the '90's Cuby & the Blizzards reunited. The famous & excellent guitarplayer Eelco Gelling however stayed at home and was replaced by Erwin Java. The cd 'Travelling with the blues' is a live-record wich contains songs from the early cuby-days as well as newer songs Muskee recorded in the 70's & 80's. The six piece band is here in fine shape and is being accompanied by a good horn-section. The ongoing mission of Cuby to bring the blues to the Dutch audience is well succeeded with this record. Inbetween was a new studio-cd 'Dancing Bear', a compilation 'Blues Traveller' & a brand new cd 'Hotel Grolloo' released. ---Amazon.com
