The rhythm and blues harp vocabulary available to the Honeyboy has been acquired in the only way possible, years on years of playing the harp with R n' B acts in smoky venues and recording studios.

His time with Steve Marriot started the idea that was to become the R 'n'B album featuring songs that a harp player would choose. "Sleeping in the ground", "Don't believe in nothing", "Cant hold out much longer" and even a version of "La Cucaracha" that will put a smile on the bluest heart. Recorded at John Entwistle's studio in 1994, the recording band features Brendan O'Neil - GERRY McAvoy - Anthony Thistlethwaite with appearances by GERAINT WATKINS - STEVE GIBBONS - THE KICK HORNS (RODDY LORIMER, TIM SAUNDERS, SIMON CLARKE) & BIG AL TAYLOR.

Recorded in a 'studio live' situation, the recording features real performances by human players, unfettered by technological intrusion. No computer processors feature in the performances. Straight from the heart playing really. ---honeyboyhickling.com
