Groovy blues with a killer band and a young outstanding lady on the vocals. Ina's voice is amazingly strong possessing a lot of unprejudiced courage as her distinctive style brings freshness to the songs. The other band members are well-seasoned professionals in the blues genre, and the outcome is a smooth combination of strong experience and young open-mindedness. ---helgetallqvist.com

This album features groovy blues with a vintage rock/R&B tone, a killer band and a young, outstanding lady belting out the vocals. Ina's voice is amazingly strong, possessing a lot of unprejudiced courage as her distinctive style brings freshness to the songs. The other band members are well-seasoned professionals in the blues genre, and the outcome is a smooth combination of strong experience and young open-mindedness. Of course, Helge Tallqvist's harmonica work is a highlight which will certainly appeal to all blues fans. This all blends into an extremely tantalizing formula that propels these blues into another dimension (one that retains a good old rock feel). ---Don M., amazon.com
