The music on these sides is the product of different sessions that represent, between them, a veritable Blue Book of West Coast jazz. At the head of each ensemble, enjoying himself to the full, is trumpeter extraordinary Maynard Ferguson. Most of the men heard in this CD were old friends, either colleagues from the Stan Kenton band or Californians with whom he had worked on and off for several years. 18 total tracks originally recorded in 1950-54. ---amazon.com
