good artist we got out there, theres a few, Vico C is one of the only ones left, its also nice to have an artist that actually put all his love and writes and makes the beats for all his songs, not like most of the other that have ppl as writers, i dont buy cd's that often but this one is a must if your into the urban genre, in this vico c shows all of his talents, from pure reggeatton, to love songs, to slower and faster songs.... incredible master piece... if you think desaogo was a a lirical mastery this one puts vico c on another level as an artist that very few will ever reach, inded Vico is babiloso... ---Nelson, amazon.com
