Personnel: - Donovan – guitar, harmonica, vocals - Tony Carr – percussion - Harold McNair –  
flute – Mickie Most – producer

Donovan in Concert is the sixth album from Scottish singer-songwriter Donovan, and the first live album of his career. This concert was recorded in September 1967, several months before Donovan released *A Gift from a Flower to a Garden*, and the concert included several songs that would not have been widely known to a US audience, including some which were UK single b-sides. "Poor Cow" is introduced by Donovan as "Poor Love", its original title, which was changed when the song appeared in the film *Poor Cow*. It retained that title when released as the b-side to "Jennifer Juniper" in February of 1968.

The music at the concert was much more subdued than Donovan's singles of the time, and Donovan was backed by the core group of musicians who had recorded with him on his previous albums including flautist Harold McNair and percussionist Tony Carr. They play many genres of music, from folk to jazz. The concert was introduced by an unnamed announcer, who then hands the proceedings to Donovan's father Donald Leitch.
