Nirvana - Hormoaning (1992)

1. Turnaround [play](#) 2. Aneurysm 3. D-7 4. Son Of A Gun [play](#) 5. Even In His Youth
6. Molly's Lips

Nirvana * Kurt Cobain – guitar, vocals * Dave Grohl – drums * Krist Novoselic – bass guitar

This EP originally was released in Austrailia in early 1992 and later released in Japan (as noted in With the Lights Out boxed set). I bought this in 1994 after the death of Kurt Cobain for 30 dollars and I've always treasured it because it is rarer than the albums and commercial singles. The music itself is good. "Even in His Youth" IS NOT included on With the Lights Out and is only available on the Smells Like Teen Spirit single. Four songs were covers recorded for the BBC ("Turnaround", "D-7", "Son of a Gun" and "Molly's Lips"). Except for "D-7" the other three appear on Incesticide but D-7 is available in the With the Lights Out boxed set. The other two tracks were unreleased on albums. "Aneurysm" appears on incesticide but this version only appears on With the Lights Out and Smells Like Teen Spirt single. The Japanese version includes text in Japanese and a black and white photo. The design is very similar to Nevermind except with more yellow in the water. Basically, with the release of With the Lights Out and Incesticide, the only reason to get this is for an otherwise unattainable version of "Even in His Youth." This is only for major collectors of Nirvana. I'd would give it a 5 as a die-hard Nirvana fan but because it's pricey for its length and 80% of the material is available elsewhere I must give it a 4.
